

Paper Transcription & Translation: Cut-outs

Copy Instructions

Make *single-sided copies* of the cut-outs.

- There are 5 versions of page A; each codes for a different protein.
- Give each student (or pair) one version of page A.
- Divide page B into 3 sets of strips. Give each student (or pair) a set of mRNA strips and a protein strip.

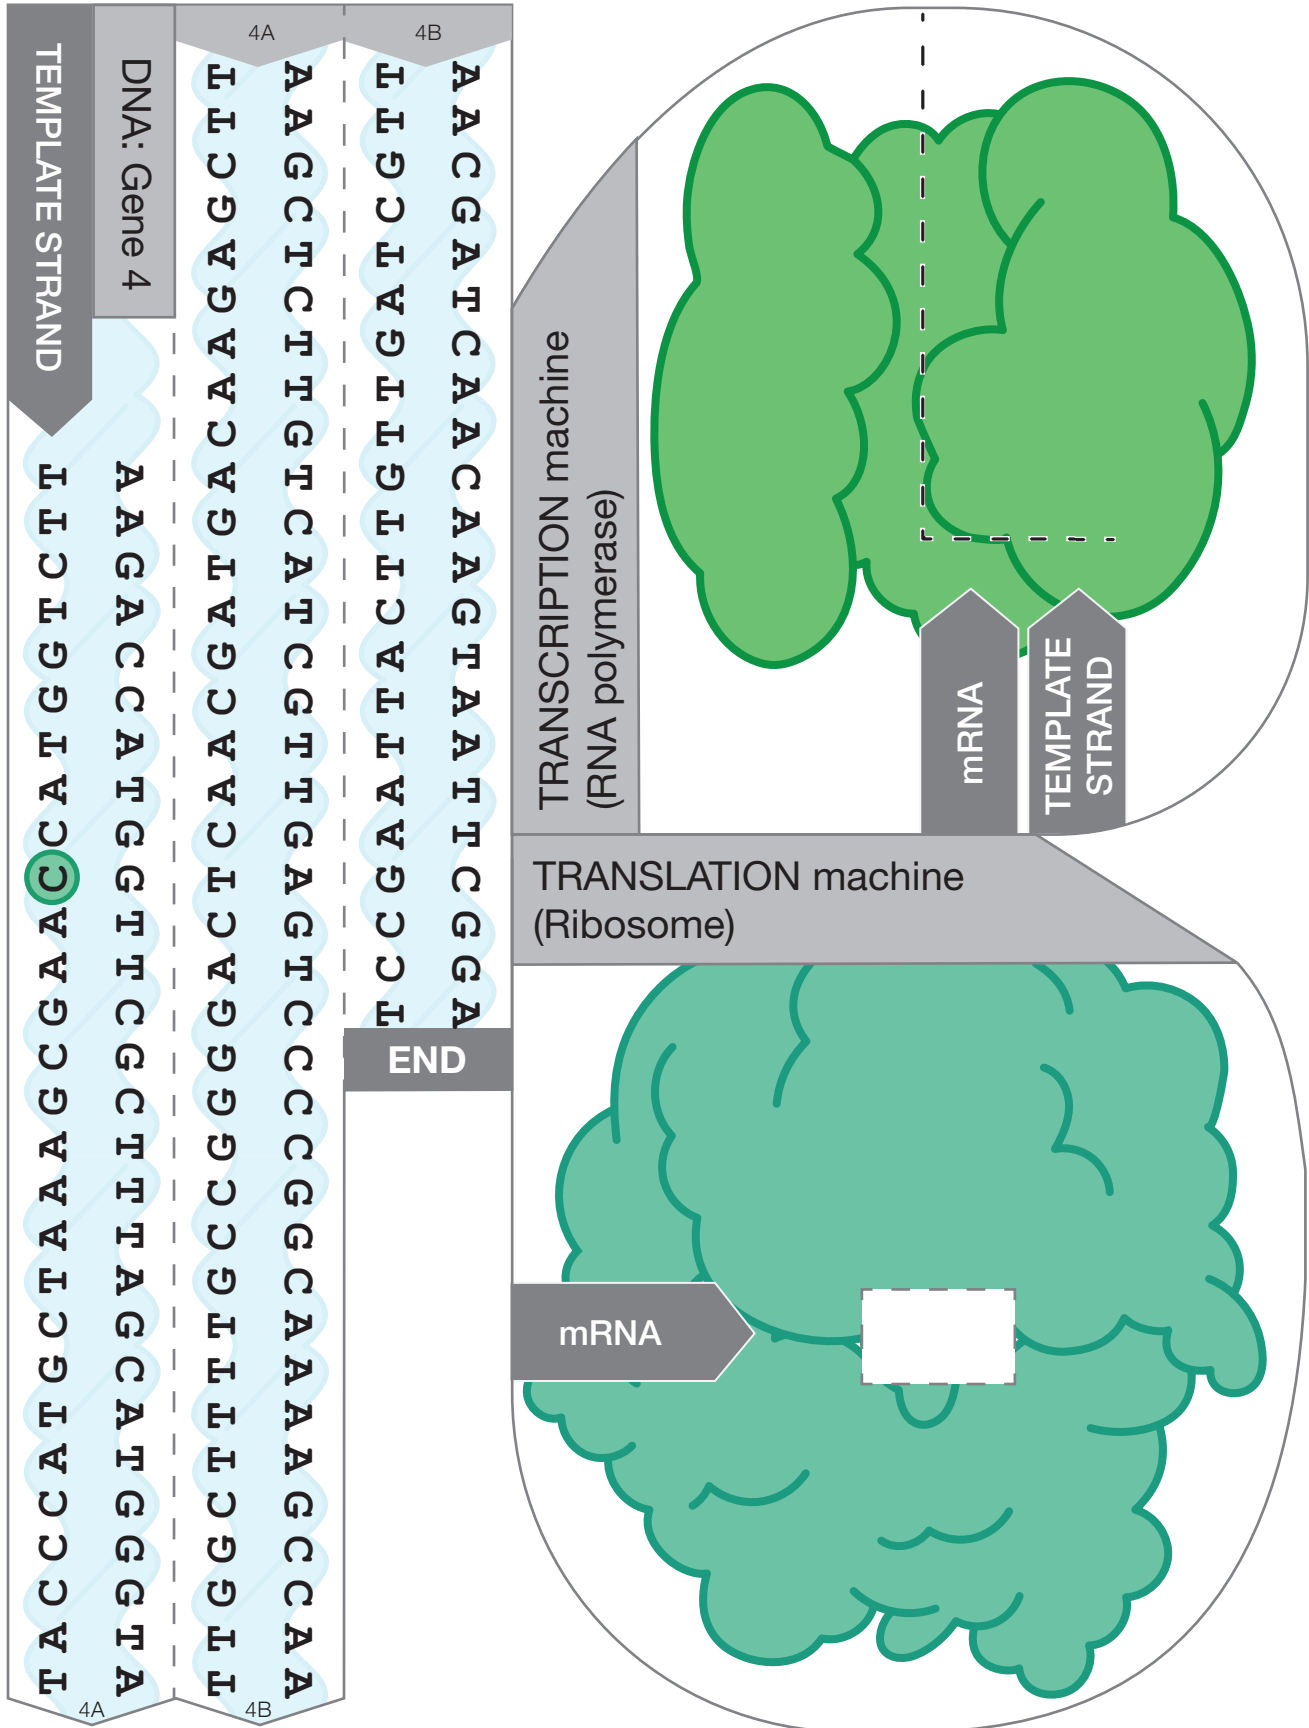

Tips

- Make color copies of page A and laminate them so that they may be re-used.
- Cut out the pieces on page A in advance. This will save a lot of classroom time.

To make one long strip each of DNA and mRNA, tape the shorter pieces together end to end.
