| Check your chosen ethical question. | <input type="checkbox"/> Should scientists use results from experimental overseas stem cell therapies to advance their own work when the therapies don't meet their own country's scientific or ethical guidelines? <input type="checkbox"/> Some biotech companies are forming partnerships with overseas stem cell clinics and using them to conduct studies that would be illegal for these companies to conduct in their own countries. Should companies be allowed to use the results of these studies to gain approval in their own countries? |
