

# Model an mRNA Vaccine: Cut-outs

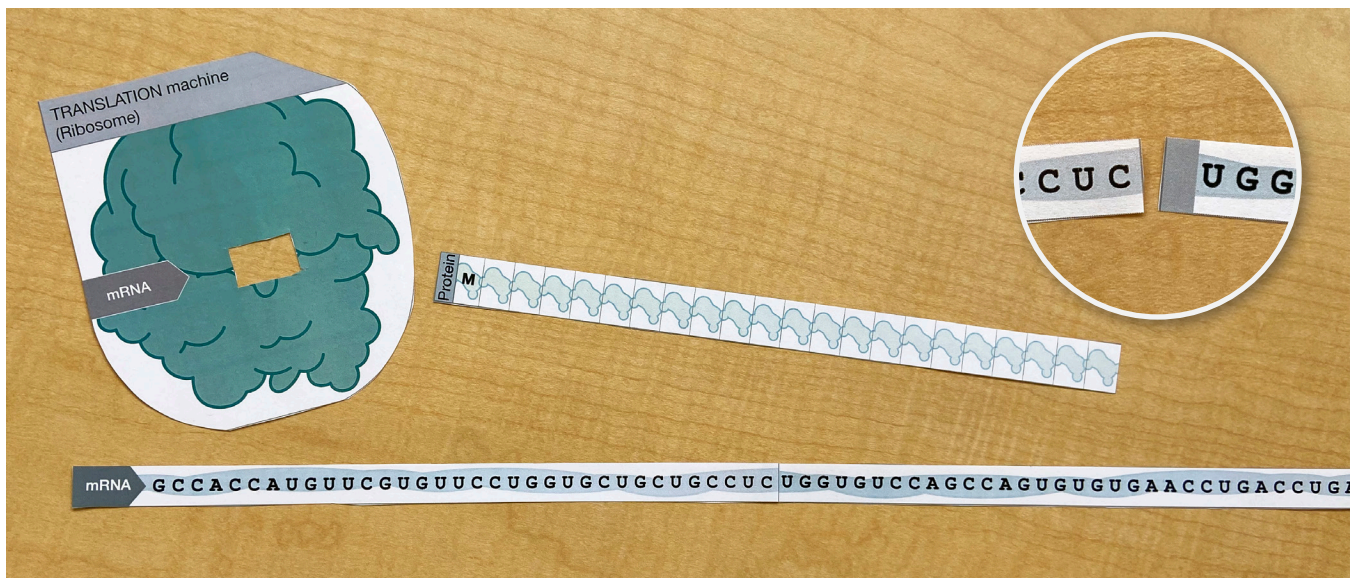

## Copy Instructions

### Make *single-sided copies*

- One page includes two sets of cut-outs.
- Give each student (or pair) a set of 2 mRNA strips, a protein strip, and a ribosome.

### Tip

- Cut out the pieces in advance. This will save a lot of classroom time.

To make one long strip of mRNA, tape the shorter pieces together end to end.
